Prepared for procurement, consortium, and enterprise bid engagement.

Contact: procurement@romhle.com

Registration Number: 2020/780636/07

Executive Summary

Romhle is an AI and Data Intelligence company delivering enterprise-grade analytics, verification systems, and decision intelligence platforms across regulated environments.

Our operating model supports direct delivery, subcontracting, and consortium work.

Strategic Solutions

1. AI & Machine Learning Platforms
2. Data Engineering & Architecture
3. Decision Intelligence Systems

These capabilities are delivered through modular architectures and measurable outcomes.

Flagship Products

Sentiment Master: Real-time emotional intelligence for service and risk contexts.

Yimi: Identity, income, and employment verification for emerging markets.

Both products are proprietary IP built and maintained by Romhle.

Technical Capabilities

AI Engineering, Data Architecture, Cloud and Platform Engineering,
Governance and Compliance Analytics, and Enterprise Platform Development.

Deployment options: Azure, AWS, hybrid, and on-prem.

Industry Footprint

Public Sector, Financial Services, Insurance, and Development Finance.

Delivery references and engagement details are available where disclosure permits.

Compliance and Governance

POPIA and GDPR-aligned controls.

Ethical AI and responsible model governance principles.

Security-by-design with auditability and access control patterns.
